

### Headset Conversion Criteria.

#### Interphone F4 (F3 and F2 City)

Socket fitted to boom mic and plug, heat shrink used to contain wiring and Additional components. Old speakers cannot be converted as unusable after conversion.

**Cardo Scala** Inc: Scala Rider Solo, Scala Rider fm, Teamset pro, Q2 Pro, G4/G4 Power set/G4 Instructor set, Tom tom 2 Socket fitted to speaker cables, 3.5mm stereo jack fitted to existing speakers halfway through the shorter cable. Also includes an inline jack on the speakers so that they can still be used.

#### Scala G4

Socket fitted to speaker cables, 3.5mm stereo jack fitted to existing speakers halfway through the shorter cable. Also includes an inline jack on the speakers so that they can still be used.

#### Shuberth bluetooth collar/skirt

Socket fitted to speaker cables, 3.5mm stereo jack cannot be fitted to existing speakers as it will be very short. Socket exits back of helmet.

#### Sena SMH10

Socket fitted to speaker cables, 3.5mm stereo jack fitted to existing speakers halfway through the shorter cable. Also includes an inline jack on the speakers so that they can still be used. The latest version of this system has a socket in the back, and so no conversion is necessary.

#### Midland BT

Socket fitted to speaker cables, 3.5mm stereo jack fitted to existing speakers halfway through the shorter cable. Also includes an inline jack on the speakers so that they can still be used.

**Scala rider solo** is a single earpiece headset. If used with normal sound ear they can be wired so both channels have audio, but this will render them as dual channel mono for every device they are used with.

**All headset** speakers that are adapted will have between 90mm and 150mm of cable length.

**All 'sets' for conversion** must be supplied without the helmet, and with the charging & main units.
